DETAILED ACTION

Due to the complex nature of the claims, no request for an oral election is being made. Please see MPEP 812.01.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14 and 25-28 are drawn to a method of treating an individual afflicted with an inflammatory disorder comprising administering to said individual an effective amount of at least one compound, a 2,3-benzodiazepine, classified in class 514, subclass 221.
- II. Claims 15-24 are drawn to a method of treating an individual afflicted with an inflammatory disorder comprising administering to said individual an effective amount of a combination of at least one 2,3-benzodiazepine and one or more additional therapeutic agents, classified in class 514, subclasses 221, 290 and 310.
- III. Claims 29-31 are drawn to a method of preventing or delaying the onset of an inflammatory disorder in an individual who is at risk of developing an inflammatory disease, comprising administering to said individual an effective amount of at least one 2,3-benzodiazepine, classified in class 514, subclass 221.

The three inventions are independent and distinct, each from the other as they have acquired a separate status in the art as shown by their different and separate subject matter for inventive effort. Further, a reference, which anticipates any one of the

Art Unit: 1614

above inventions, would neither anticipate nor make obvious of the other inventions. Each such invention is capable of supporting its own patent. For these reasons, the restriction requirement is proper.

To be complete, applicants' response must include a provisional election even though the requirement may be traverse.

The applicants are required to elect a single invention for examination purposes.

If the applicants elect Group II (claims 15-24), they must also elect an additional therapeutic agent from claims 16-24.
